14	2024-07-17	Irene Kuo, Rebecca Greiner	Everyone else	Irem Ozseker	Hanna Müller	Demo day!
15	2024-07-24	Irene Kuo, Rebecca Greiner	Everyone else	Sandeepkumar Ramesh	Hanna Müller	Retrospective

Goals	1. Finish tasks for each sprint on time.	
Meeting norms	1. Be on time! (send a msg in WhatsApp if you'll be late) 2. Show up (unless deathly sick) 3. Try to participate actively	
Working norms	1. Good comments/documentation of work so everyone can follow easily. 2. Don't do everything the day before it's due. 3. Reach out if you have questions, help each other out!	
Coordination norms	1. Make it clear on the feature board what you're working on. 2. If you're overwhelmed, communicate so we can reassign tasks.	
Communication norms	1. Create WhatsApp group and reach out for questions and concerns there first (informal quick chats) 2. Discord for screenshots, code concerns, one point of reference for project items.	
Consideration norms	1. Be kind to each other.	
Cont. improvement norms	1. Have a retrospective after each sprint.	
Rewards	Everyone bring your own treat and we can have a celebratory meeting at the end!	
Sanctions	If you're more than 5min late without notice, 1pushup per minute late is owed.

Product owner	Rebecca Greiner	
Software developer	Nikolas Rauscher	
Software developer	Irem Ozseker	
Software developer	Yash Bhesaniya	
Software developer	Filipe Borges	
Software developer	Kristi Kotini	
Software developer	Florian Hoffmann	
Software developer	Sandeepkumar Ramesh	

Product Vision	Project Mission
<p>An AI-powered chatbot that helps any user query and extract knowledge from uploaded document(s). Through generating knowledge graphs from a corpus of text, information and knowledge is organized in a smarter way that is able to reveal different insights that may not have been noticed before.</p> <p>The knowledge graph will include communities of concepts and can be used to uncover insights and links between seemingly disconnected concepts. Through querying knowledge graphs, users can more quickly gather the correct information and potentially gain additional understandings that are not noticeable without the graph communities.</p>	<p>The mission of this project is to create a MVP for the knowledge graph generation in order to visually see clusters of information and how they're linked. The knowledge graph will include a basic search function to query information.</p> <p>Core functionality will be ingesting user document(s), processing the data and extracting relationship entities through the use of LLMs, building and storing the knowledge graph, an interactive visual representation of the knowledge graph, and a basic search function for entities in the knowledge graph.</p>

[illegible]

Sprint #	Sprint goal
1	None
2	None
3	None
4	Optional
5	Finish all basic components/functions in preparation for connecting them all for the end-to-end functionality (upload -> knowledge graph visualization).
6	MVP for mid-project with upload through 1st basic visualization of knowledge graph
7	Update UI and knowledge graph finetuning
8	
9	
10	
11	
12	
13	
14	
15	

Sprint	Goal	Feature Name	Est. Size	Est. Remaining	Real Size	Real Remaining
<b>Release</b>						
<b>Total</b>			124	124		
<b>Sprints</b>						
1	Getting started		0	124	0	124
2	Define technologies, create software architecture and user interface design		13	124	13	124
3	Setup project environment		16	111	14	111
4	Ingestion of documents and LLM setup with POC of data processings		32	95	31	97
5	Preparation of individual functions to connect for the MVP		32	63	32	66
6	MVP for mid-project with upload through 1st basic visualization of knowledge graph		31	31	31	34
	Sum					
<b>Features</b>						
1	Getting started	Setup feature board	n/a		n/a	
2	Define technologies, create software architecture and user interface	Team logo	n/a		n/a	
		Create software architecture overview	5		5	
		Design user interface	8		8	
3	Setup project environment	Set up initial project environment (backend excluding LLM container)	8		8	
4	Ingestion of documents and LLM setup with POC of data processings	PDF parsing into text	5		3	
		Text to .json chunks	3		3	
		Interface setup	3		3	
		Allow user to upload PDF document(s)	5		5	
		POC: Graph visualization	5		5	
		Setup Mistral locally: documentation	3		2	
		POC: Prompt template for LLM	3		5	
		Syntax checking for JSON and converting to graph format	5		5	
5	Preparation of individual functions to connect for the MVP	Update software architecture diagram and documentation	1		1	
		Prepare LLM setup for dev team	2		2	
		POC: combine graph pieces with LLM	8		8	
		Create record in database	5		5	
		LLM function	3		3	
		Generate graph button	5		5	
		CORS implementation	3		3	
		CI/CD improvements	2		3	
		HW: Build process video	3		2	

[illegible]

	Goal	Feature Name	Est. Size	Est. Remaining	Real Size	Real Remaining
<b>Release</b>						
<b>Total</b>			112	112		
<b>Sprints</b>						
7	Streamline UX and work on additional knowledge graph generation tasks		26	112	26	112
8	Update UI and knowledge graph fine-tuning		31	86	27	86
9	Enhance graph visualization and LLM-usage		26	55	30	59
10	Graph search functionality and UI improvements		29			
11	Finalize graph search and graph visualization					
12	Finish final project release and prepare for demo day					
<b>Sum</b>						
<b>Features</b>						
7	Streamline UX and work on additional knowledge graph generation tasks	Linting/Formatting	3		3	
		Create landing page	3		3	
		View list/table of existing knowledge graphs	5		5	
		Create new knowledge graph button (link to current user flow)	2		2	
		Delete uploaded document from upload screen	3		3	
		Refine .json extraction from LLM results	3		3	
		Refine graph connections	3		3	
		Ordering size of nodes for graph visualization	3		3	
		Remove JanusGraph	1		1	
8	Update UI and knowledge graph fine-tuning	Update user interface pages to design theme	3		3	
		Allow users to delete knowledge graph	2		2	
		POC: Query knowledge graph (to help with evaluating it)	8		5	
		Improve visualization based on different node sizes	3		3	
		Experiment with different approaches	5		5	
		View knowledge graph from table list	2		1	
		Graph display text/node color + less overlapping of nodes	8		8	
9	Enhance graph visualization and LLM-usage	Clustering of nodes / topic modeling: attributes	5		5	
		Link entities to page	3		3	
		Run linting and fix any errors	2		2	
		Finetuning of prompt template and ontology - make it more abstract and more concise	3		3	
		Look deeper into centrality measures for making network more concise	3		3	
		Finetune force-based algorithm for node positions	2		5	
		Split view - to show more information on left side, graph on right	3		3	
		"Generate" button to link to generate graph for documents that only have been uploaded	2		3	
		Refactoring: "delete uploaded document" button	3		3	
10	Graph search functionality and UI improvements	POC: Graph search with embeddings	8			
		Hover over node, return page numbers	3			
		Display of most extracted entities	5			
		Clustering of nodes / topic modeling: coloring	3			
		Responsive web design	2

How to play planning poker							
1. Everyone type their number into their value field, don't hit return yet							
2. Someone, perhaps a product owner, count down 3.. 2.. 1..							
3. Then, everyone hit return to submit their value
